

Chronic Kidney Diseases as a Global Public Health Problem Approaches and Initiatives

KDIGO – Amsterdam - 2006

CKD in Latin America

Emmanuel A. Burdmann

LATIN AMERICA 2004

539,041,148 inhabitants

Per capita income US\$ 3,600

Life expectance: 70.9 y

Annual populational growth: 1.4%

20 countries

21 national societies

4,700 nephrologists

SLANH

*Sociedad Latinoamericana
de Nefrología e Hipertensión*

- **Around 228,500 patients currently treated for renal failure.**
 - ✓ **128,260 in hemodialysis**
 - ✓ **54,180 in peritoneal dialysis**
 - ✓ **48,450 with a functioning renal transplant**

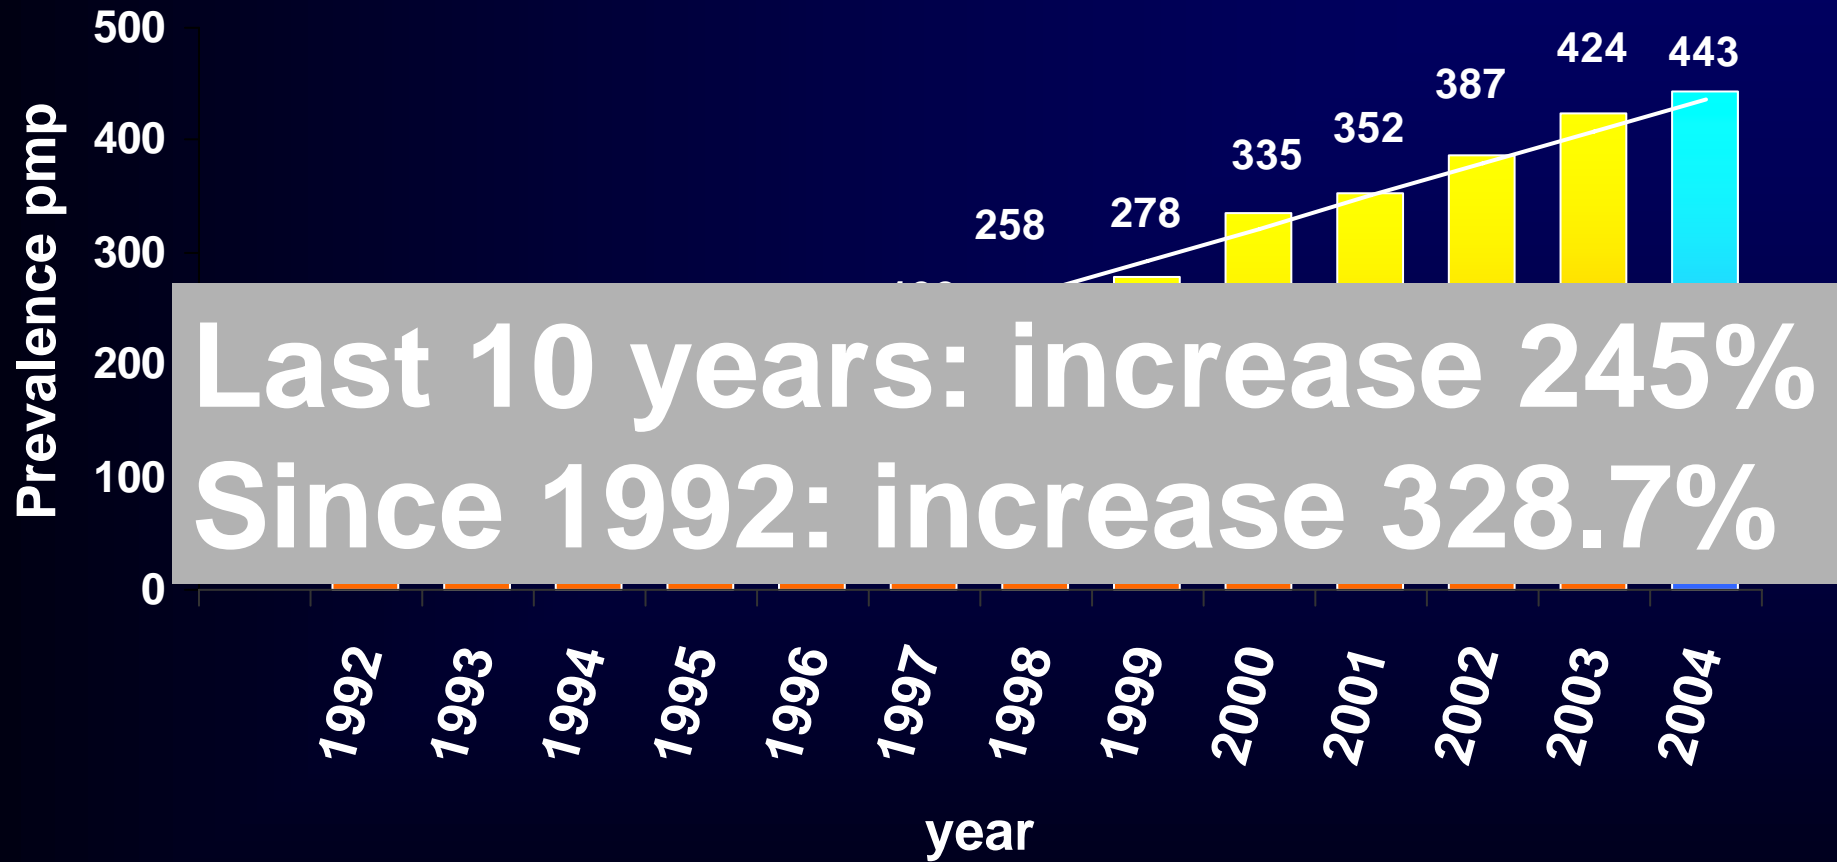

LATIN AMERICA 2004 – ACCESS to RRT

- **Argentina, Brazil, Cuba, Puerto Rico, Uruguay, Venezuela 100 %**
- **Colombia 56.2%**
- **Peru 30%**
- **Paraguay 25 %**
- **Bolivia 63% (55.6% only twice a week)**

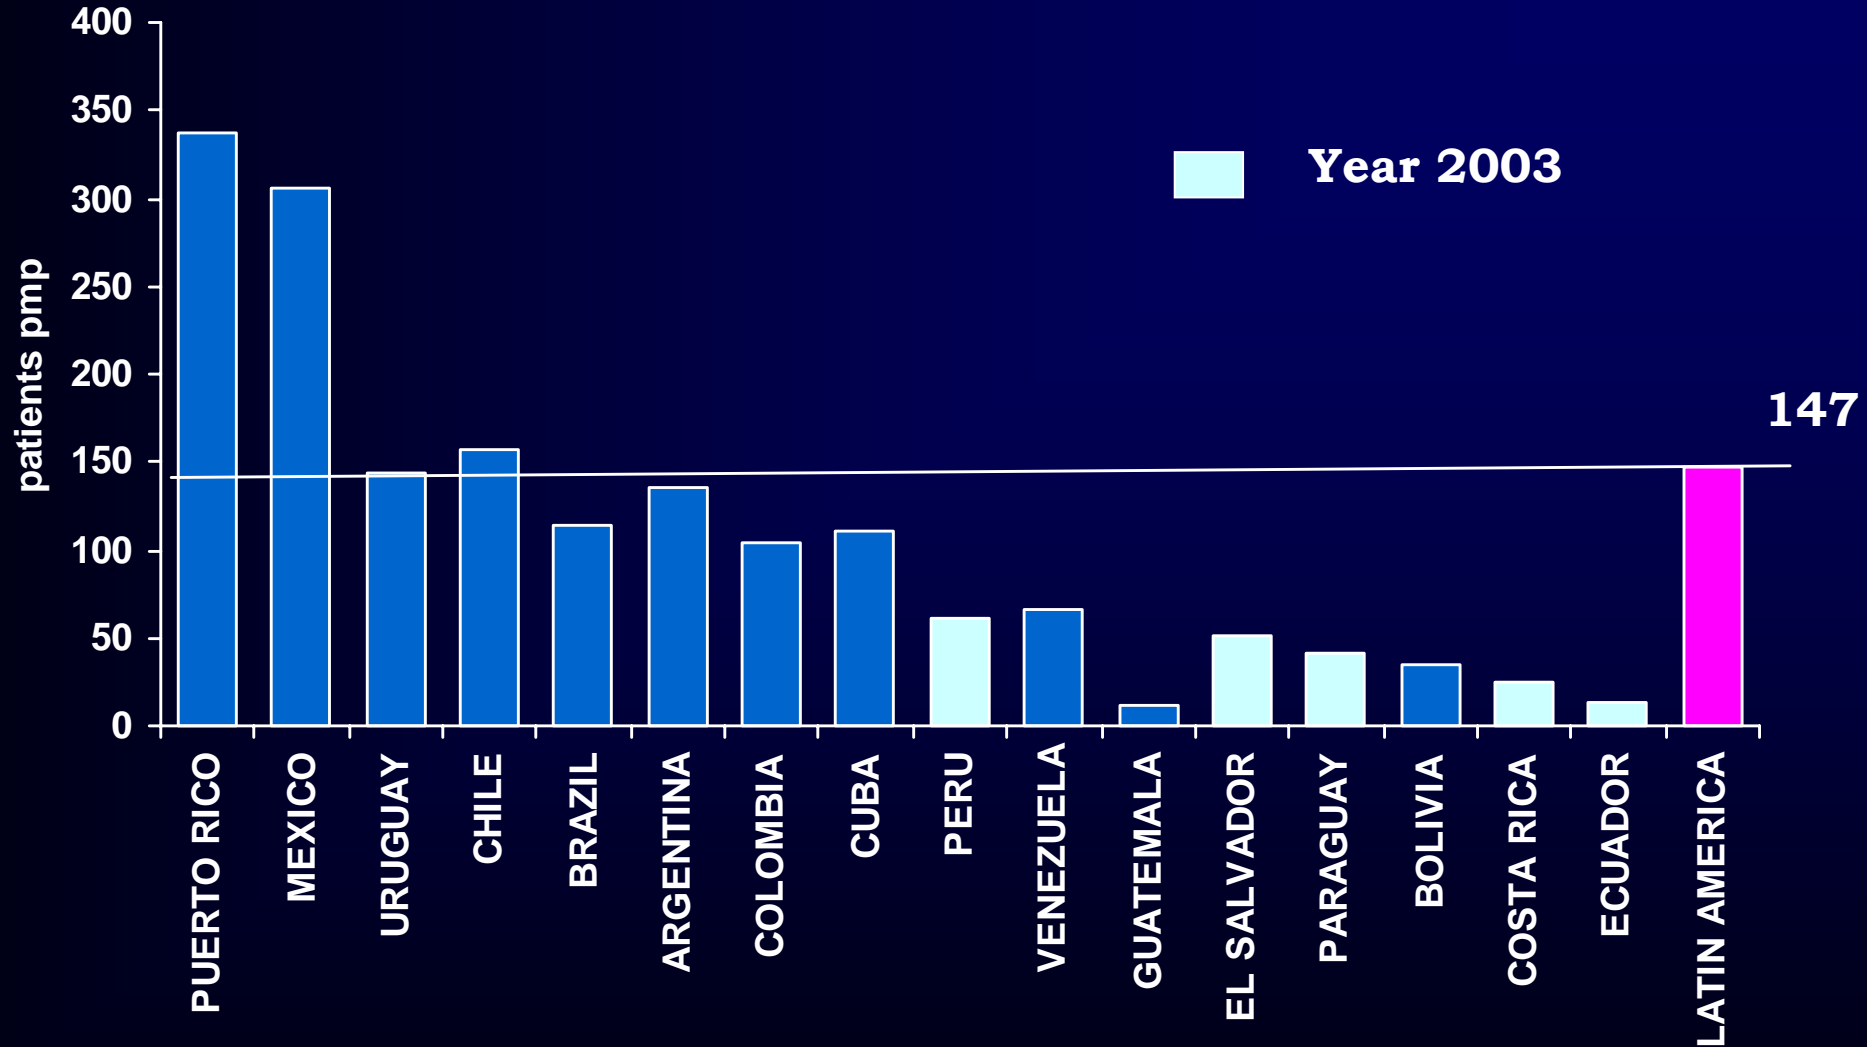

Latin American Registry 1992-2004

Treatment of ESRD, prevalence rate, all modalities

Incidence by Country 2002-2004

Diabetic nephropathy as etiology (2004)

Argentina	22 %
Bolivia	36 %
Chile	33 %
Colombia	30 %
Guatemala	20.7 %
Puerto Rico	55.2 %
Mexico	40 %
Mean 7 countries	34.22%

HEMODIALYSIS REIMBURSEMENT

Country	US\$	Reuse
Argentina	60	yes
Brazil	45	yes
Colombia	87-90	no
Chile	68	yes
Guatemala	85	no
Mexico	81-145	almost not
Uruguay	70	yes
Venezuela	28-30	no

CKD DETECTION AND SURVEILLANCE PROGRAMS

Argentina

Bolivia

Brazil

Chile

Costa Rica

Guatemala

Mexico

Uruguay

Venezuela

✓ **National Societies**

✓ **Governmental**

✓ **Academic Institutions**

✓ **Dialysis Groups**

✓ **Kidney Foundations**

Brazilian Society of Nephrology

- ✓ Program “Previna-se”
- ✓ Blood/urinalysis, BP, health survey
- ✓ Different locations (2003-2006)
- ✓ 188 different locations in 2006

Prevenir é melhor do que remediar!

Miguel Carlos Riella

Curitiba

<i>Clinical and dipstick abnormalities</i>	<i>Screened population (n=8883)</i>
Age (years)	48±16
Male gender (%)	45
History of Systemic Hypertension (%)	16
History of Diabetes Mellitus	3
Hematuria (%)	30
Proteinuria (%)	6
Glycosuria (%)	4
Hematuria and Proteinuria	4

Detection of renal dysfunction based on serum creatinine levels in a Brazilian community. The Bambuí Health and Ageing Study

V.M.A. Passos^{1,3},
S.M. Barreto^{2,3},
M.F.F. Lima-Costa^{2,3} and
the Bambuí Health and
Ageing Study (BHAS) Group^{3*}

Departamentos de ¹Clínica Médica and ²Medicina Preventiva e Social,
Faculdade de Medicina, Universidade Federal de Minas Gerais,
³Laboratório de Epidemiologia e Antropologia Médica,
Centro de Pesquisas René Rachou, Fundação Oswaldo Cruz,
Belo Horizonte, MG, Brasil

- ✓ **2,000,000 individuals**
- ✓ **Abnormal serum creatinine: 0.43%**
- ✓ **In elderly (>60 years): 5.09%**

Chile National Health Survey 2003 (ENS 2003, PUC – 3619 subjects)

- **Elevated creatinine: 6.7 %**
- **Creatinine clearance < 30 ml/min: 0.18%**
- **Creatinine clearance 30-80 ml/min/1.73 m²: 21%**
- **Proteinuria: 14.2%**
- **Hypertension: 34%**

ESTIMATED CHRONIC KIDNEY DISEASE in URUGUAY

According NANHES III distribution and the Uruguayan ESRD prevalence

Population over 20 years old : 2.386.032

	NANHES III % of Population	Uruguay % of Population	Uruguay CKD Population
Stage 1	3,3	2,0	47.783
Stage 2	3,0	1,8	43.521
Stage 3	4,3	2,6	62.380
Stage 4	0,2	0,12	2.900
Stage 5	0,2	0,12	2.900
total	11,0	6,7	159.576

de Nefrología e Hipertensión*

Kidney International, Vol. 68, Supplement 97 (2005), pp. S23–S30

Sustainable and tenable renal health model: A Latin American proposal of classification, programming, and evaluation

RAFAEL BURGOS CALDERÓN and SANTOS DEPINE

Section of Nephrology, Department of Medicine, University of Puerto Rico, School of Medicine, San Juan, Puerto Rico; Special Program Administration, Ministry of Health, Buenos Aires, Argentina

Meetings hold in Chile, Argentina, Mexico, Uruguay, Paraguay, Venezuela, Colombia, Equator, Puerto Rico, Peru, Brazil

CKD in Latin America

- ✓ **Extremely heterogenous pattern.**
- ✓ **Significant increase in prevalence.**
- ✓ **Large number of patients are not diagnosed.**
- ✓ **Increasing burden of chronic diseases like diabetes.**
