KDIGO Clinical Practice Guidelines
KDIGO GUIDELINES

• Translate scientific advances into useful and practical clinical practice recommendation statements and practice points
• Based on a systematic review of existing evidence including the best and latest information available
• Designed to provide information and assist decision-making
• Developed by a knowledgeable, multidisciplinary panel of global experts and representatives from key stakeholders
• A forum for patient involvement as appropriate
• Based on an explicit, scientifically rigorous and transparent process that minimizes distortions, biases, and conflicts of interest
• Reflective of ratings of both the quality of evidence and the strength of the recommendations
• Are reconsidered and revised as appropriate whenever important new evidence warrants modifications of recommendation
LATEST GUIDELINE — HOT OFF THE PRESS!
