

Autosomal Dominant Polycystic Kidney Disease (ADPKD) Guideline

Table of Contents

Chapter	Subsections, when applicable
Chapter 1. Diagnosis and prognosis	
Chapter 2. Kidney manifestations	2.1: Hypertension 2.2: Nephrolithiasis 2.3: Urinary tract and kidney cyst infections 2.4: Kidney cyst hemorrhage and/or hematuria 2.5: Renal cell carcinoma (RCC) 2.6: Chronic kidney pain 2.7: Gout
Chapter 3. Chronic kidney disease (CKD) progression, kidney failure, and kidney replacement therapy (KRT)	3.1. CKD progression 3.2: Kidney transplantation 3.3: Chronic dialysis
Chapter 4. Nonpharmacologic and pharmacologic therapies to delay ADPKD progression	
Chapter 5: Polycystic liver disease (PLD)	
Chapter 6. Intracranial aneurysms (ICA) and other extrarenal manifestations	6.1: Intracranial aneurysms (ICA): 6.2: Other vascular associations: 6.3: Cardiac associations (e.g., left ventricular hypertrophy, valvular heart disease, atrial fibrillation, idiopathic cardiomyopathies, and congenital heart disease) 6.4: Muscle-skeletal manifestations 6.5: Other associated cysts and diverticula
Chapter 7. Lifestyle and psychosocial aspects	
Chapter 8. Pregnancy, reproductive issues and choices	8.1: Pregnancy 8.1.1: Mother 8.1.2: Fetus 8.2: Reproductive issues 8.2.1: Options to prevent the birth of an affected child
Chapter 9. Pediatric issues	
Chapter 10. Approaches to management of patients with ADPKD
